Greetings

Thank You for purchasing this **RoutCad**® product. You have received the latest version of the **RoutCad 2D** software, which has the added **BONUS** capabilities of: importing and exporting .dxf files, automatically offset objects, etc. We invite you to consult the software user manual by going to the Help Menu and selecting Help Topics (**Help** \Rightarrow **Help Topics**) or by opening the *usermanual_english.pdf* file located in the RoutCad 2D root installation directory. You can also view the Quick Start videos (**Help** \Rightarrow **Quick Start Video**). These videos provide a quick tutorial on how to use the RoutCad 2D software.

In **ADDITION**, you can download two free utility software for generating .dxf text that you can import in RoutCad 2D, save as .cad and merge to your projects. You can also customize the **config.txt** file located in the RoutCad 2D installation directory to change: the line color, background color, etc.

Regards, The RoutCad Team. software_support@routcad.com (for software support).

Computer ID:71-70-52-80-69-83 1		

7) Your License is now activated. Congratulations !

When Installing and Running RoutCad on **Windows 7** or **8** PC Administrator Rights are Required

With the new Microsoft Windows 7 or 8 you need to be login into an Administrator account for installing and running the software (not a Guest or User account). *Furthermore, in Windows 7 or 8 the CD may take a long time for the auto run to start the installation (up to several minutes)*. If it is the case, do not interrupt the installation by closing any windows or ejecting the CD, just give it some time and the installation will start.

To install and run the software as an Administrator is really easy to do:

- 1) Log into an account with Administrator privileges with your password
- 2) Install RoutCad in that account
- 3) When running RoutCad always "click yes at the prompt that ask to allow this program to make change to my computer
- Or
- 1) Exit the RoutCad software
- 2) Place the mouse over the RoutCad shortcut icon
- 3) Click the Right Mouse or Right Touch Pad button
- 4) Select "Run as administrator"
- 5) When running RoutCad always "click yes at the prompt that ask to allow this program to make change to my computer"

	Open
	Troubleshoot compatibility
	Open file location
•	Run as administrator

Select Left Side to Compare

For example:

On a computer running Windows 8, log into your account with your password (account with Administrator privileges) then insert the RoutCad installation CD, click "yes at the prompt that ask to allow this program to make change to my computer".

After RoutCad is installed in your account with administrator privileges, just double clicked the routcad shortcut icon and click "yes at the prompt that ask to allow this program to make change to my computer" and RoutCad starts normally.

After installation the computer ID you will get will look something like this: note : This is an example your PC computer ID will be different.

Computer ID : 51-78-86-54-48-50 1

The computer ID is always 12 digits (meaning 6 pair of digits). Each pair of digit is separated by a -. The 1 at the bottom indicates success (RoutCad properly initialized). If you see a 0 at the bottom this indicates a failure or (RoutCad not properly initialized).

With Windows 7 and 8, always install and run RoutCad as an Administrator.

Once you install and run RoutCad as an Administrator and get a valid computer ID, you can use the license manager to get your license number by going to <u>http://www.routcad.com/english/license.html</u> or send us an email at software_support@routcad.com
